Profile

Software engineer with a strong focus on backend development, specializing in Python, Django and Django REST Framework. Experienced in designing and delivering scalable, production-grade systems for real-world applications. Proficient in RESTful API architecture, relational database design and cloud deployments. Committed to writing clean, modular code and growing expertise in software architecture and system design.

Professional Experience

Join Venture AI

Jr. Backend Developer

Oct 2025 – Present
Mohakhali, Dhaka

- Built and maintained scalable REST APIs using Python, Django and DRF.
- Integrated third-party services including JWT authentication, Firebase, AI models & chatbot features, etc.
- Optimized database queries and managed Docker, VPS and AWS deployments for production environments.
- Contributed to debugging, endpoint testing and performance optimization to enhance system stability and efficiency.

Trainee Backend Developer

Jul 2025 – Sep 2025

- Applied clean code principles and maintained a modular project structure aligned with industry-standard backend architecture.
- Worked closely with frontend and mobile developers to gather requirements and deliver reliable, well-structured API responses.

Woow Tag, IT Support

Nov 2023 – Mar 2025
Baridhara DOHS, Dhaka

- Managed ERP system content for inventory, orders and supplier records.
- Provided technical support and coordinated timely content delivery.
- Supported company websites and digital platforms, ensuring smooth operations and timely updates.

Skills

Programming Languages – Python | Javascript

Backend – Django | DRF | Django ORM | Django Channels | WebSocket

Frontend – HTML | CSS | JS | Bootstrap | React (Familiar)

Data & Tasks – PostgreSQL | MySQL | SQLite | Redis | Celery

DevOps – Git | GitHub | GitHub Actions | Docker | Nginx | VPS | AWS

APIs & Tools – OpenAI API | Firebase | Google Maps API | JWT Auth | Postman

Education

B.Sc. in Software Engineering, Daffodil International University
CGPA: 3.13 out of 4.00

Aug 2019 – Oct 2023

Higher Secondary School Certificate (HSC), Dinjapur Government College
GPA: 3.50 out of 5.00 ~ Group: Science

2018

Secondary School Certificate (SSC), Mathurapur Public High School, Thakurgaon
GPA: 5.00 out of 5.00 ~ Group: Science

2016

Projects

Health Ride, Non-Emergency Medical Transportation Platform

A live SaaS platform for NEMT providers, including a web-based provider portal and a mobile app for drivers. I'm building the entire backend as the sole backend developer using Django REST Framework. The platform supports real-time trip scheduling and dispatching, driver tracking, passenger trip management, facility billing and role-based operations with HIPAA-compliant architecture and secure data handling.

BANCre, Real Estate Financing Platform

A commercial real estate financing platform DRF backend I built (under upgrade) with multi-role access, AI-powered document processing, automated financial models and offering memorandums, lender deal review, loan quote comparison and a centralized deal room with CRM-style distribution.

Link: [BANCre Web](#) 

Stovetop Radio, Music Streaming App

A full-stack music streaming app where I built the entire backend using Django REST Framework. It powers a Flutter mobile app and includes authentication, music browsing, playlists, play history, and personalized recommendations.

Link: [Stovetop Radio - Play Store](#) 

NHA MobileConnect, Nevada Homeless Alliance App

A production backend I built with Django REST Framework for a nonprofit app. The mobile app is built with Flutter and helps users find shelters, food, clinics and support services. Features include JWT authentication, OTP reset, AI chatbot, location-based search and push notifications.

Link: [NHA MobileConnect - App Store](#) 

Lumo Electrical, Wholesale E-Commerce Platform

A DRF backend I built as the sole backend developer for a wholesale e-commerce platform. The frontend is built with Next.js. It includes JWT authentication, multi-step customer onboarding, OTP email verification, product catalog with search/filtering and contact management features.

Link: [Lumo Electrical Web](#) 

Life Pulse, Safety Monitoring App

Developed the complete backend for LifePulse, a safety monitoring platform for individuals living alone, using Django REST Framework, Celery, Redis, PostgreSQL and Twilio. Ensured reliable automated check-ins and real-time emergency SMS alerts.

Link: [Life Pulse App](#) 

Maximum Savings, Shopping Discount Platform

A DRF backend I built as the sole backend developer for a role-based discount platform for essential workers. It includes JWT auth, OTP verification, brand approval workflow, role-based permissions and a structured offers system.

Link: [Maximum Savings Backend Github](#) 

MovingWyze, Logistics Tracking App

A Django REST Framework backend I built for a logistics tracking app MVP. It includes JWT authentication, driver/company/warehouse management, load sheet automation, task tracking and a public shipment tracking API.

Link: [Movingwyze App](#) 

Bongo Music, Music Streaming Platform

Bongo Music is a Django based full-stack Bangla music streaming platform. I built it as my university final year project. It supports music streaming, user authentication, favourites, history tracking, search and Stripe-based premium subscriptions.
